

The Word Jungle

A New Kind of Language Learning Software

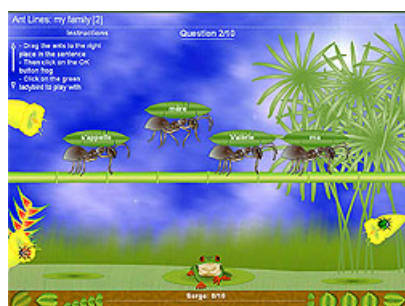

The Word Jungle is a **multimedia program on CD-ROM** for students from year 4 to year 9 to learn and practise a language: **French or German, Japanese, Italian, Greek, Indonesian, Chinese, Spanish, Yiddish**, etc... This program features 9 to 12 game templates (depending on the language version) which include sound and animations. Each game uses an animal characteristic to explain a grammar point. One of the most interesting functions of this program is that **teachers can insert their own texts to make an unlimited number of new games**. They can even record their voice and add new images (Recorder). With this new technology, teachers can easily make exciting games that really help their students to practise what they have just learnt in class, according to their level, their needs and the curriculum. **A new game is made in a few minutes with the help of a very user-friendly interface** (the Game Maker). Many schools are already using The Word Jungle: Loreto, Carey, Korowa, Genazzano, St Leonard's, Firbank, etc...

-- NEW FEATURES --

- **The Game Maker**
User-friendly teacher interface to remove, change or make new games.
- **The Recorder**: to record your voice and save your images for the games.
- **Score Saver**: a function that saves the scores of the students in the class list.
- **Import-Export function** to share games between computers and via email.

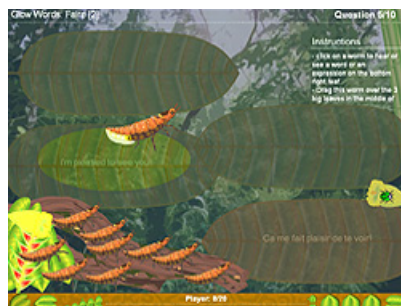

What You Play Is What You Learn!

Each game helps the players to improve a specific language skill: reading, writing, listening or understanding. The "Bird" game is different in the Japanese version (The Kanji Tree) and the Chinese version (Bird Tone Nests). Also, "Chameleon Adjectives" becomes "Chameleon Characters" in the Japanese and Chinese versions.

ANT LINES

Make well constructed sentences

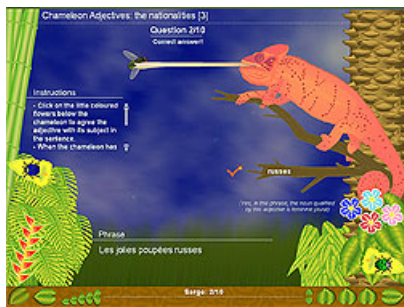

GLOW WORDS

Phrases that light up the language!

BIRD ARTICLE NESTS

Match articles with nouns

CHAMELEON ADJECTIVES
Adjective agreement game

CATEPILLAR WORDS
Find the missing words

ELEPHANT MEMORY TEMPLE
Match words, images and sounds

HANGBAT
Read the clues to write the words

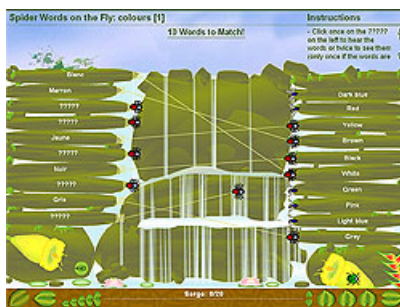

MONKEY SPELLING
Listen and write the words

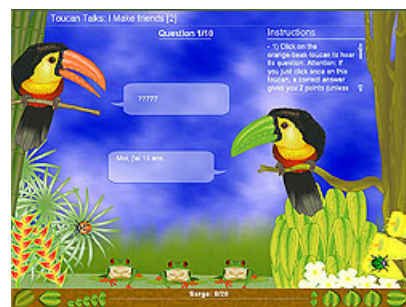

OWL QUIZ
What is right, what is wrong?

SNAKE VERBS
Fun verb conjugation game

SPIDER WORDS ON THE FLY
Link the words over the waterfall

TOUCAN TALKS
Have a chat with the toucans!

At the end of each game, students can see and print their score with their name, the date, their answers and the correct answers. The program records the scores to enable the teachers to check them at any time.

Prices in Australian dollars (AU\$100 = about 77 US\$ = about 60 euros. GST only applies to Australia)
The Word Jungle costs \$1000 + GST for an **unlimited license**. The school can use it with no limit of time or number of users and number of copies. The teacher interface to make the games is a separate program called The GameMaker and costs \$180 with the Recorder or \$120 without the Recorder + GST. The games can be made without this interface but it is much easier with the GameMaker and the Recorder. Each additional language version costs only \$120 + GST and each additional language version of the GameMaker costs only \$40 + GST. It is also possible to buy the program with the interface and only a selection of games (three minimum. \$120/game + GST). Special price for small schools (< 400 students).

The Word Jungle has been designed by Serge Mimoun with the LOTE Department of Loreto Mandeville Hall in 2004 and 2005. Serge Mimoun is a multimedia designer and programmer, specializing in educational programs. He has already designed many web sites and multimedia programs for Firkbank Grammar School (www.youpi.com02.com), Shelford (www.ruedesclics.com), Presbyterian Ladies College (lol – Lote on Line), Carey Baptist (The Smart Channel), Xavier College (La Boîte a Jeux) and also for Heinemann and Thomson Learning.
